OVERVIEW

These practical training courses are tutored by professional Engineers, Attorneys at Law, mediators, arbitrators and adjudicators with extensive international experience. The courses provide explanations and illustrates the use of the FIDIC Conditions of Contract for Construction (the Construction Contract Red Book) the FIDIC Conditions of Contract for Plant and Design-Build (the “Design-Build Contract” Yellow Book) and the Short Form of Contract (Green Book).

These courses are designed to help participants have confidence in working with these documents whether representing Employers, Consultants or Contractors and provide professionals with essential contractual know-how for working on future international projects. Case studies where applicable will be explored for the benefit of participants.

The courses are applicable to all the Parties involved with these Contracts including representatives of the Employer, the Contractor, the Engineer, and associated professionals. By having a professional understanding of the proper use of the 1999 FIDIC contracts, major reduction in claims, budget overruns and delays occur and successful completion of projects are significantly increased.

The tutors are provided by ECV Consultancy Limited (ECV) FIDIC accredited tutors in collaboration with FIDIC.
